

Company Profile

As of October 10, 2023

Minerva Corporation was established in August 1976 to participate in import and export business of specialty chemicals, which last for about 30 years.

In 1994, we started to supply 'Meivet' (Nutritional supplement for dogs) to Meiji Seika Pharma Co., Ltd. for the first time and 'Meivet DC' (Improved formula of Meivet) was subsequently developed jointly with Meiji Seika in 2001. Since then, the supply of these products to Meiji Seika has been continued.

In 2005, we started to manufacture and import several nutritional supplement preparations and distribute them through our own distribution channels to pet clinics all over Japan. The company thus makes an effort to expand its activity to the related area of living environments (nutritional supplements, foods and care products for human and animals) in addition to the primary business of specialty chemicals.
